

自己做：如果地球被我们吃掉了

DIY: Looking after our world

Contains: craft activity and a choice of two worksheets

This Chinese-English bilingual resource will help children learn the importance of reducing waste and recycling!

Complete the collage art craft activity to make a banner.

Use your craft to talk about how waste, pollution, overfishing etc. harms our planet. Then practice 'if...' sentences with our worksheet!

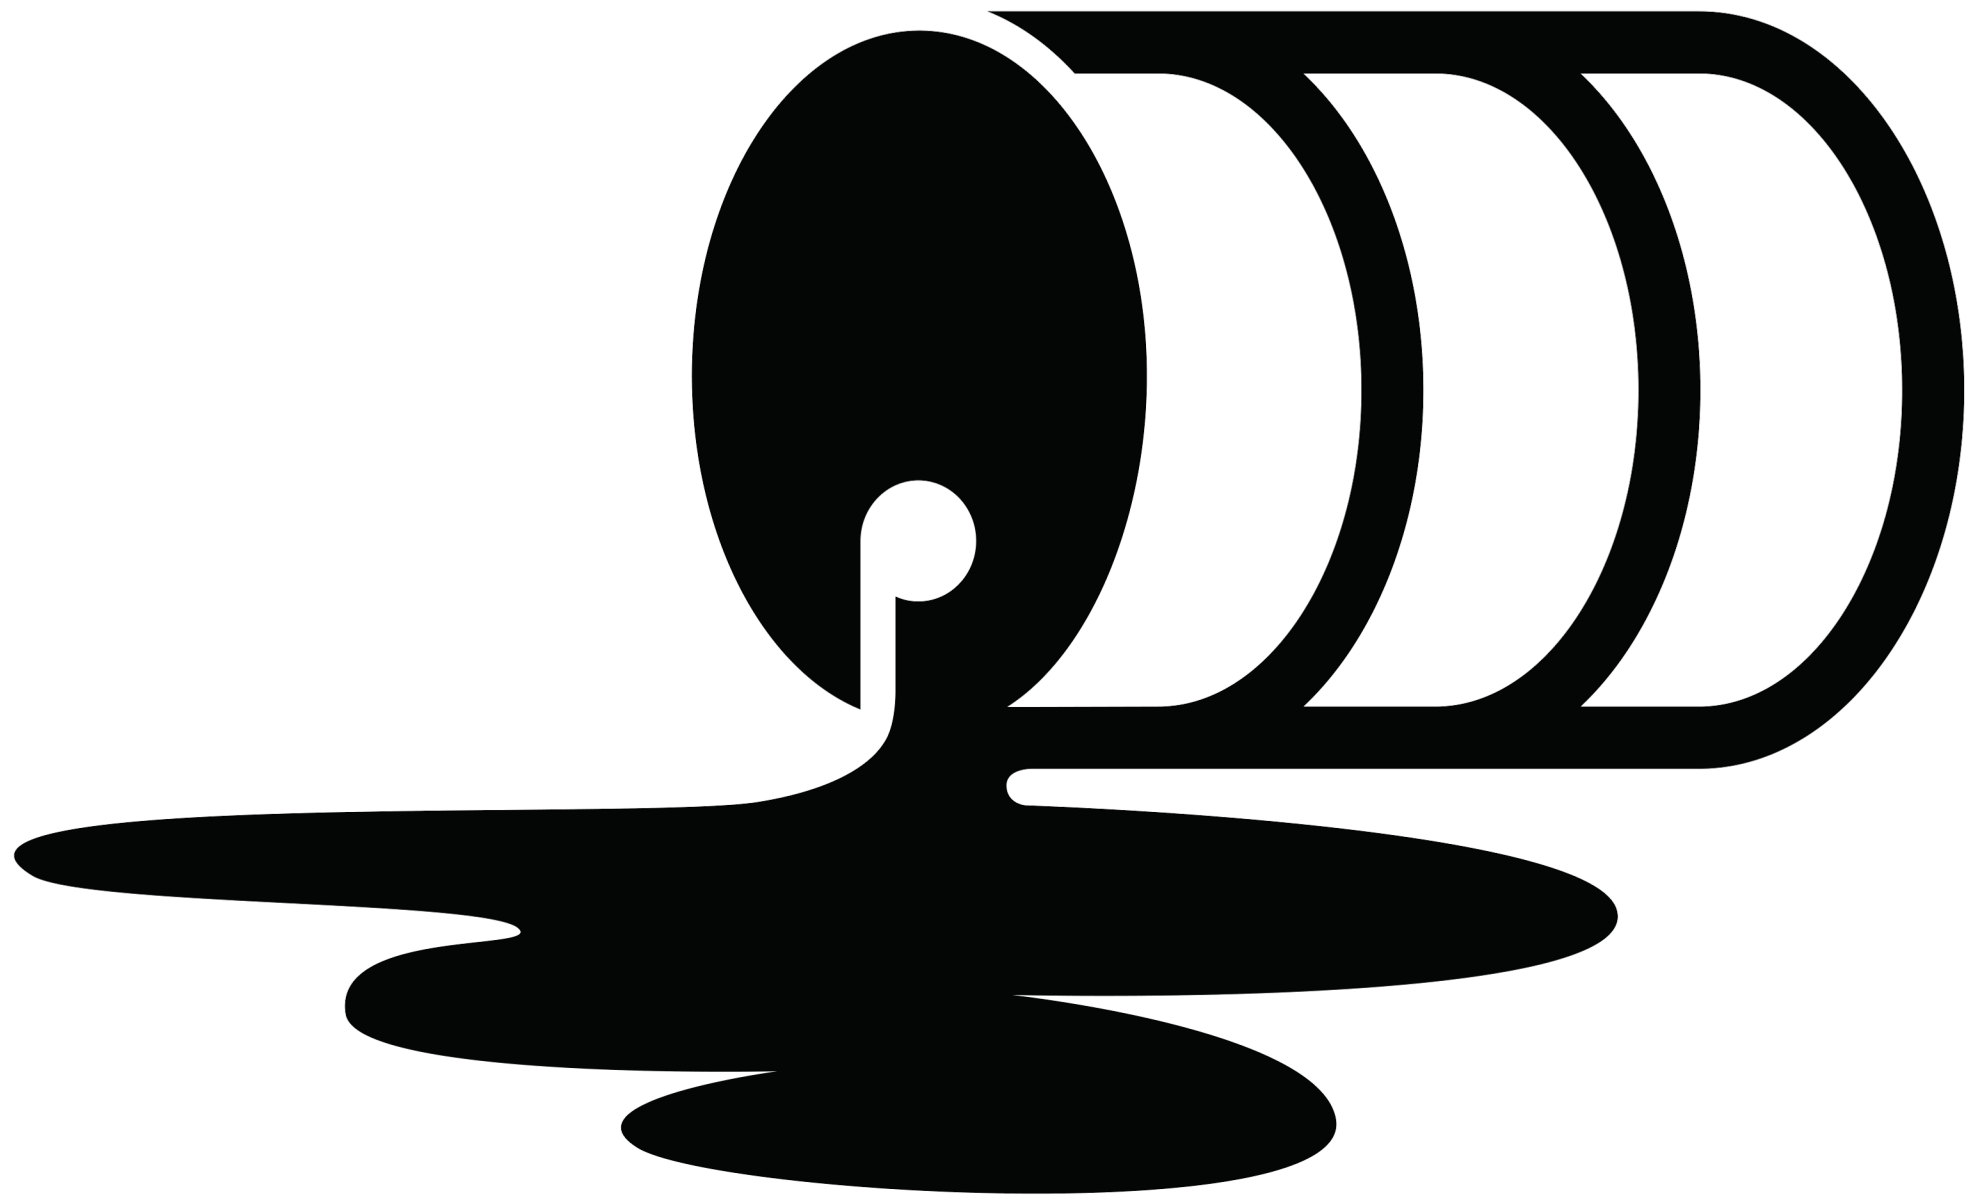

Think first...

1. Trace the Chinese characters and English words. These are 3 raw materials!
2. How does using this resource effect the environment?
3. What would happen if all of it was used up by humans?

Let's craft!

1. (Optional) You can stick each page onto some cardboard to make this sturdier.
2. Gather some waste materials. You could use plastic bags, paper, packaging — anything! Make sure your materials have been thoroughly cleaned.
3. Cut your materials into different shapes and stick them onto the paper.
4. Attach each page to a piece of string to make a banner. Or hole punch and tie together to make a book.
